

Meeting Minutes:

Conference call between ADEQ and PRP's to discuss comment from the FS Report.

Allan Gates
Kelly
Mark Hemingway
Dave Robertson
Allan Nigh
Dave Backus

Comment No. 1) This boils down to Appendix A (done by CTEH) and section 5 don't mesh.

Comment No. 2) Tammie says that MNA by itself is not acceptable when you have contamination off-site above the MCL

Comment No. 3) Regarding the drum vault, they did not establish a performance statement. Mark said every place with soil contamination can't be actively remediated, including below the drum vault. But Tammie say's they need to clarify this in the section.

Tammie then discussed the risk comments.
